Grille
Ceilings & Walls

Grille panels are excellent visual design elements for great-looking ceilings and walls. Grille ceiling installation is easy using our attachment clip system to 15/16" HD T-Bar grid, and both backered and doweled panels are 100% accessible. Wall panel direct attach installation is also very easy with screws. Standard rail dimensions and spacings are available on our website. Grilles can be stained to match a control sample and perimeter trim options are available. The system offers design flexibility with five grille styles available. Grilles may be paired with acoustical liner for enhanced acoustics.

FEATURES

APPEARANCE & COLOR
Available in solid wood & veneer in the species shown below*
Five styles available: Backer, Backer and Dowel, Dowel, Notched Backer, and Tegular Lay-in
